Re: MEGApix® Pano™ 21MP multi-
        sensor firmware update

MEGApix® Pano™ 21MP multi-sensor firmware update

Affecting model numbers: DWC-PZ21M69T
New firmware version: P2.2.1_20210406
Current firmware version: P2.1.3_20190111
Release date: 4/15/2021

New firmware notes:

1. Improve connectivity with DW Spectrum® IPVMS.

   • Intermittent connection loss at channels 2~4 due to too many ONVIF requests by the server. Fixed.

2. System hardening for cybersecurity:

   • Passwords must have a minimum of 8 characters with at least 4 combinations of uppercase letters, lowercase letters, numbers and special characters.

   • Passwords cannot contain the user ID.

   • SSH connection is removed.

   • UPnP, DDNS is disabled by default in the camera settings.

   • New Auto-Lock function - The system will lock for five (5) minutes after three (3) failed login attempts. Go to Setup > Security Setup > Auto Lock Configuration to enable.

   • Web connections automatically log out after ten (10) minutes of inactivity.

   • The open-source library database is up to date.

3. The ONVIF driver updated to version 20.06.
