Re: MEGApix® 2.1MP/1080p IP
cameras firmware update

MEGApix® 2.1MP/1080p IP cameras firmware update

Affecting model numbers: DWC - MV82DiVT,MB62DiVT,MD72Di28T,MV72Di28T
New firmware version: A8.2.1_20201217
Current firmware version: A8.2.1_20191213
Release date: 4/20/2021

New firmware notes:

1. System hardening for cybersecurity:
 - Passwords must have a minimum of 8 characters with at least 4 combinations of uppercase letters, lowercase letters, numbers and special characters.
 - Passwords cannot contain the user ID.
 - SSH connection is removed.
 - UPnP, DDNS is disabled by default in the camera settings.
 - New Auto-Lock function - The system will lock for five (5) minutes after three (3) failed login attempts. Go to Setup > Security Setup > Auto Lock Configuration to enable.
 - Web connections automatically log out after ten (10) minutes of inactivity.
 - The open-source library database is up to date.
2. Added System configuration import/export function. Users now can import and export settings between cameras. The following settings are excluded:
 - Network settings (except RTSP information).
 - User management and roles.
 - PTZ settings (for PTZ IP cameras only).
