Re: *DW Spectrum Mobile*
v22.1.34959 Release Notes

DW Spectrum Mobile v22.1.34959 Release Notes

New Firmware Version: v22.1.34959

Current Firmware Version: v21.1.34070

Release Date: June 3, 2022

New Features

- Added DW Spectrum Server SSL certificate verification options for encrypted connections.
One of two security modes can be selected in the settings:
 - Recommended (default) – allows you to connect to DW Spectrum Servers with valid self-signed and public certificates
 - Strict – allows you to connect to VMS Servers with only valid public certificates
 - Off/disabled – the Server will not check for any certificate verification
- Implemented session-based authentication as the default authentication type for new users that are created after installing or upgrading to DW Spectrum version 5.0.
- Added support for viewing content stored on encrypted archives.
 - The decryption password must be entered using the desktop client to view encrypted archive content.

Tested OS

Tested/Supported Android OS

- Android 8, 9, 10, 11, 12

Tested/Supported Apple iOS

- iOS 12, 13, 14, 15
- iPadOS 14, 15

Bug Fixes

- The keyboard on Android devices would not switch to Asian languages when using the search bar. Fixed.

Breaking Changes

- Incompatible with DW Spectrum Servers running version 3.2 or older

Known Limitations

- Connection to DW Cloud is not retained in DW Spectrum Mobile when upgrading versions
- DW Cloud account password must be re-entered in mobile app to connect with a System running DW Spectrum v4.2 or older through DW Cloud.
 - Push notifications will arrive to mobile app but will not show a preview until the DW Cloud password has been re-entered.
