

Release Notes

Proteus MMX version 3.4

Release Date 12/6/2016

Contact Eagle Technology, Inc. with any questions

The changes and features described in this document may describe a capability which your organization may not have as an added module/feature which has license fees associated with them.

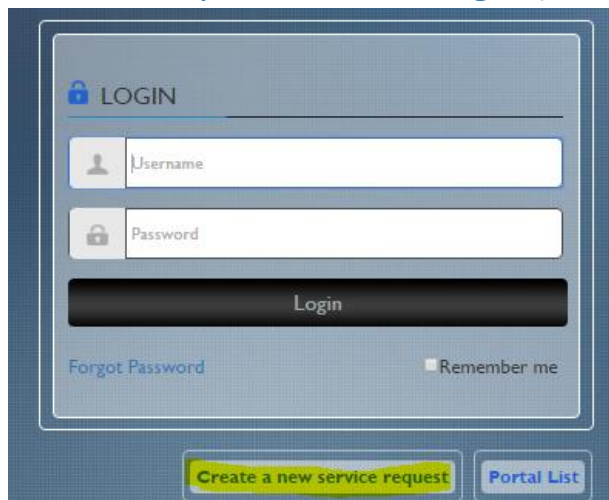

1. Work Order

Location Tree Hierarchy

- Within a Work Order a Location Hierarchy will be added when the double folder icon is selected. *NOTE: It only needs to be selected once per Work order.*

2. Service Request without login (Main page)

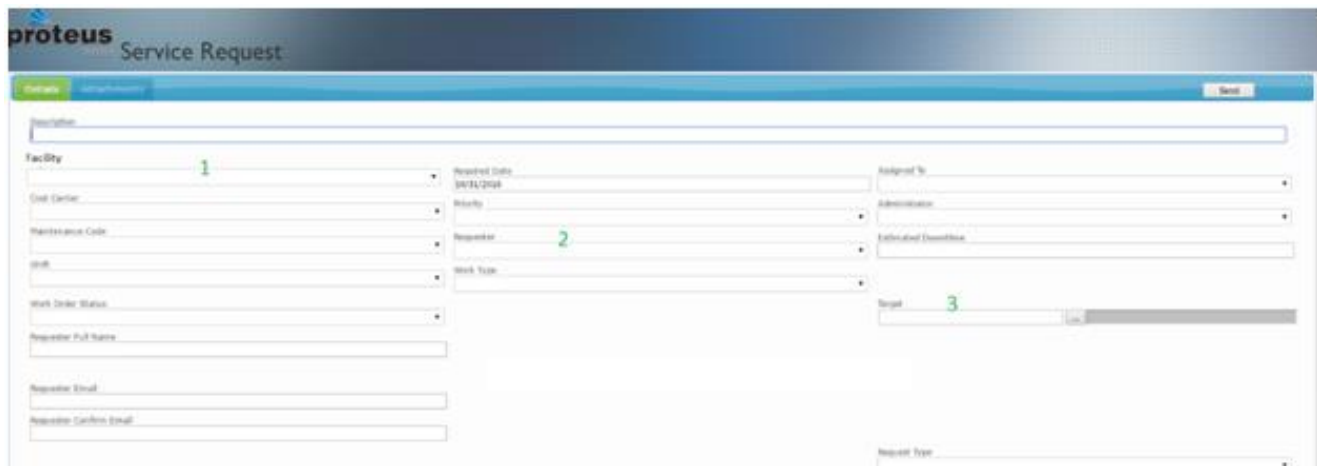

Administrator assigns

- Facility specific selections can be turned on or off.
- Following setting will be added to **“Settings - General - Global Options”**
 - Service request facilities filter **YES** **NO** (Radio button)

Service request facilities filter
☒ Yes ☐ No

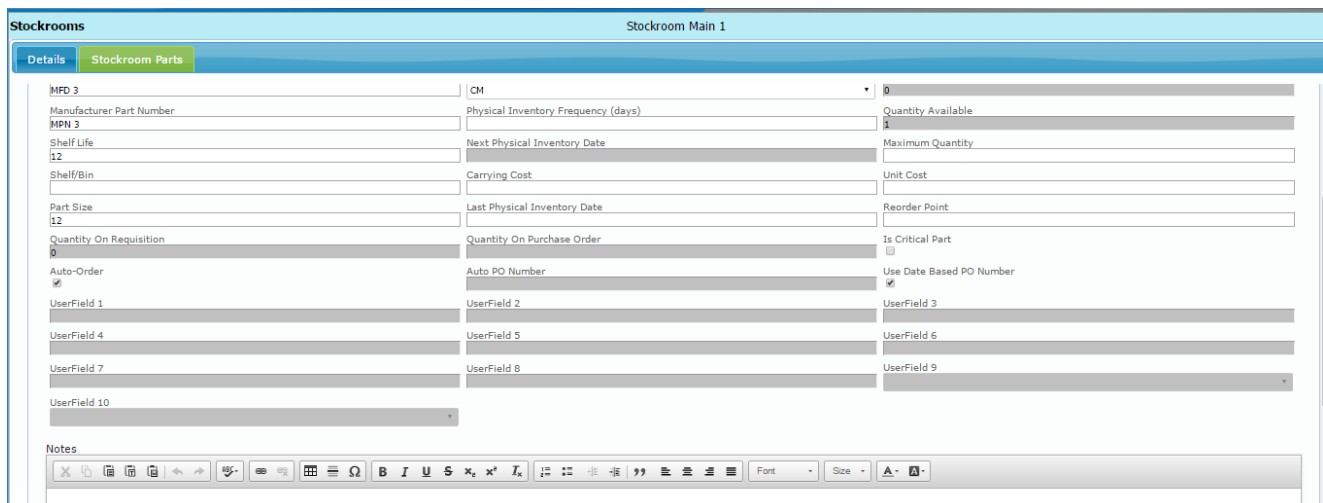

- If YES then service request filter will work.

- (1) This dropdown will populate requesters based on facilities selection by user
- (2) New facilities dropdown will be added; it will show all facilities in ascending order.
- If NO then create service request page will continue to work as it is allowing for any selections (not facility or user based)

3. Stockroom Parts fields

- Administrator can now show or hide all 10 user fields for the Stock Room Part on this screen. (No need for user to go back on part details to see those 10 user fields).

4. Search for Requester field added:

- When there is a large volume of requesters, the search function can be utilized to quickly find a particular requester by typing in a few key letters.

Settings - Company - Requesters							
Search Requester <input type="text"/>		← Inspection like search field.					
	Requester		All	Main	WHAT A FAC...	USA	Delhi
<input checked="" type="radio"/> Service Request <input checked="" type="radio"/> Purchasing <input type="radio"/> Service Request & Purchasing	asraf ashrafk@inzerotech.com + 3 (2)2x 3		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="radio"/> Service Request <input type="radio"/> Purchasing <input checked="" type="radio"/> Service Request & Purchasing	zahid zahidi@inzerotech.com		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input checked="" type="radio"/> Service Request <input type="radio"/> Purchasing <input type="radio"/> Service Request & Purchasing	Wasique Wasique@inzerotech.com		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

5. Portal List

- A Button has been added to the login page that links to a portal list.
NOTE: a user does not have to login to access this. This access can be customized in Global Settings.

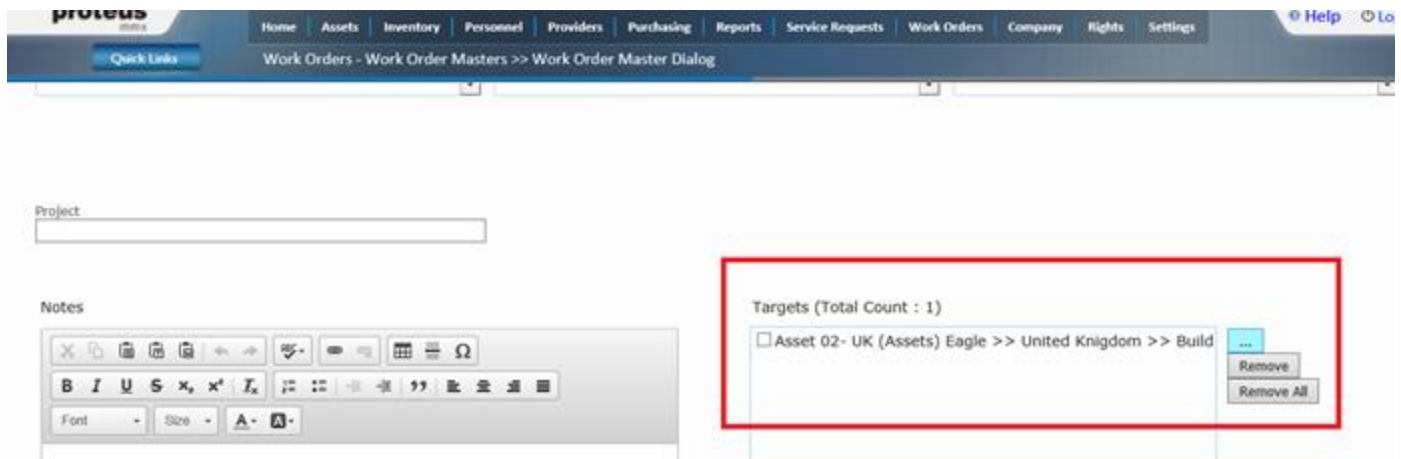

Show portal list on login page
☒ Yes ☐ No

LOGIN

[Forgot Password](#)
☐ Remember me

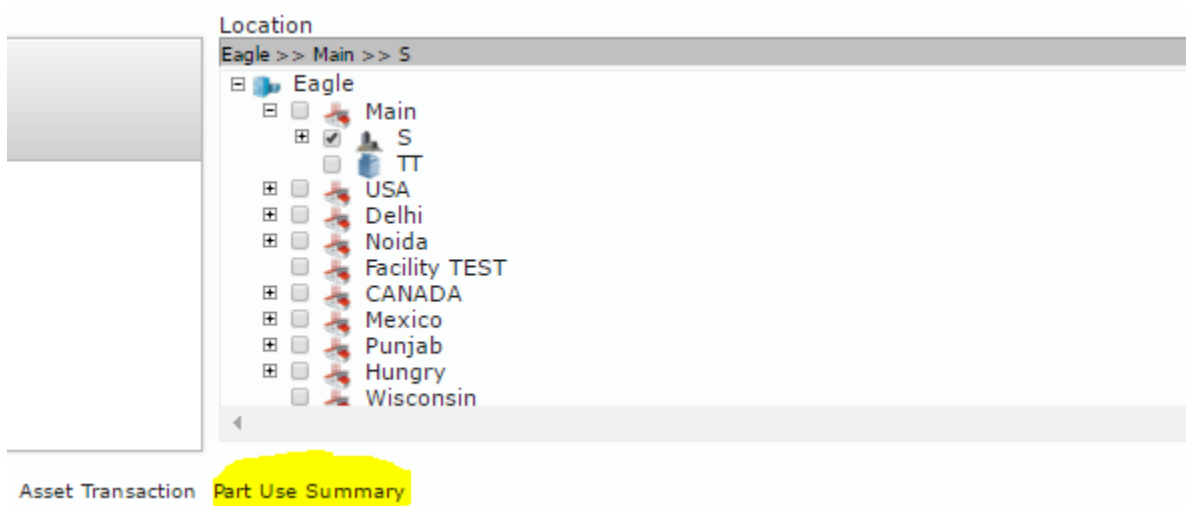

5. Work Order Master

- User can now append multiple targets for a work order.

6. Stockroom Parts and Assets

Asset Detail

- A plus sign and minus sign button for manually adding or removing assets from the list.
- When adding a new record, the user will have all the fields listed above available for editing, but only once. After the record is saved, the quantity and date last used will be automatically updated by the system.
- In Assets: For each asset, a new list called Part Use Summary has been added.

Stock Room Part Detail

[her Stockrooms](#)
[Closed Work Orders](#)
[Assets Where Used](#)

- This will reflect what is shown in the 'Where Used' list, but reversed (showing stockroom part instead of asset).

Part Use Summary			
<div>         </div> <div> Sort By <input type="text"/> Sort Order <input type="text"/> </div>			
Part Number	Part Name	Quantity Used	Date Last Used
No Data To Display
