

How to change audio output in Windows 11

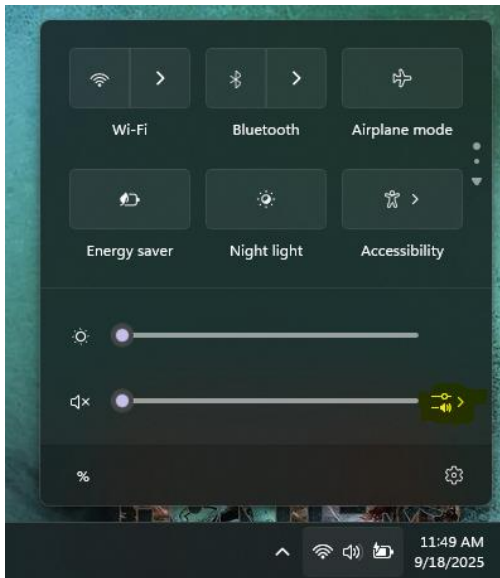

Follow these simple instructions to check and configure your audio settings.

 Need more help? Visit [Video Walkthrough](#) for additional support.

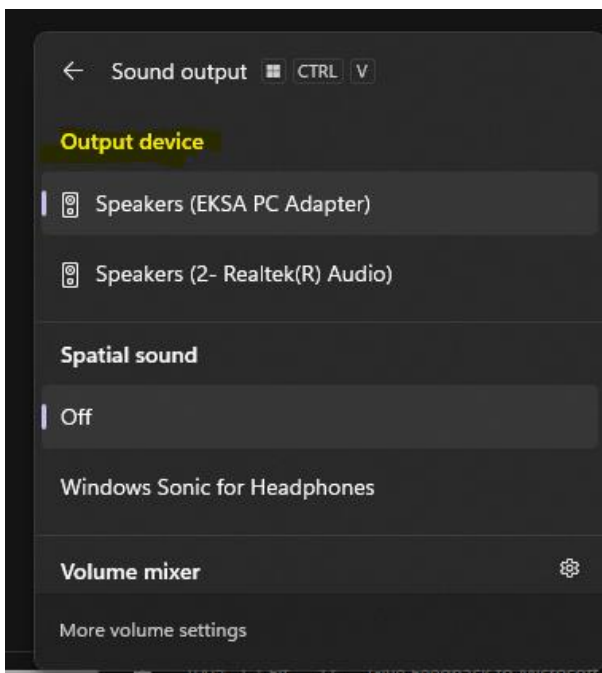

1. Click the **speaker icon** on the taskbar (bottom-right corner of your screen).

2. In the pop-up window, select the **arrow** or open the list of available audio devices.

3. Choose your **preferred playback device** from the list.

4. Adjust the **volume slider** as needed and test to confirm audio is working.
