

The following query lists performance measures that have their own report field in the criteria

```
select ind_name,
(CASE WHEN EXISTS(SELECT crt_pk FROM cw_criterion
 WHERE crt_flt_fk = ind_numerator_flt_fk
 AND crt_column_source = 'ind' + REPLACE(CONVERT(nvarchar(36), ind_pk), '-', ''))  
 Then 'Yes' ELSE 'No' END) as InNumerator,  
(CASE WHEN EXISTS(SELECT crt_pk FROM cw_criterion
 WHERE crt_flt_fk = ind_denominator_flt_fk
 AND crt_column_source = 'ind' + REPLACE(CONVERT(nvarchar(36), ind_pk), '-', ''))  
 Then 'Yes' ELSE 'No' END) as InDenominator  
from cw_indicator  
where EXISTS(SELECT crt_pk FROM cw_criterion
 WHERE crt_flt_fk = ind_numerator_flt_fk
 AND crt_column_source = 'ind' + REPLACE(CONVERT(nvarchar(36), ind_pk), '-', ''))  
OR EXISTS(SELECT crt_pk FROM cw_criterion
 WHERE crt_flt_fk = ind_denominator_flt_fk
 AND crt_column_source = 'ind' + REPLACE(CONVERT(nvarchar(36), ind_pk), '-', ''))
```

These performance measures should be edited to remove that criteria
