

Immunizations

The Immunizations tab in client records enables providers to track immunizations for clients. Immunizations need to be activated under [Clinical Setup](#) to be available in the dropdown for vaccines.

Add an Immunization to a Client Record

1. Click *Immunizations*.

2. Click *Add*.

View: View an existing Immunization record.

Add: Add a new immunization record.

Delete: Delete an existing immunization record.

Help: Access the KB article for immunizations.

Print or Export: Print or export the list of immunizations for the client.

Hide/Show Columns: Hide or show columns in the list of immunizations.

3. Enter the date of the immunization.

Find Client > Search Results > Immunizations

Save Back

Immunizations

Date: 

Vaccine:

4. Search for the immunization in the dropdown.

Find Client > Search Results > Immunizations

Save Back

Immunizations

Date: Page 1 of 3 

Vaccine:  hep a/Hep B (Twinrix)

Hep A/Hep B (Twinrix)

5. Select the immunization. Note that the CVX and CVX Code fields are filled in automatically based on the selected immunization.

Find Client > Search Results > Immunizations
