Clicking the link for the current year pulls up a screen that lists the client's current RSR issues.

Search:			
Menu Location(s)	Client RSR Data Status	Last Entry Date	RSR Check No
Annual Review > Annual Screenings	Missing Housing Status	N/A	97
Annual Review > Insurance Assessments	Missing Health Coverage	N/A	99
Annual Review > Poverty Level Assessments	Missing Poverty Level	N/A	96
Labs	Missing CD4 test results	N/A	161
Labs	Missing Viral Load test results	04/11/2024	168

In this case, the client is missing a poverty level assessment record. Once that record is added under Poverty Level Assessments in Annual Review, the number of issues decreases in the list.

The RSR Client Validation provides continuous monitoring of potential RSR issues that may arise. For a client with only Medical Case Management services during the year, that client may have fewer issues listed.

If that same client receives an Outpatient Ambulatory Health Service later in the year, the RSR Client Validation check lists required data elements for the RSR as issues that need to be resolved.
