Subject: Manufactured Housing Furnace Control Transition

1

DESCRIPTION:

Nortek Global HVAC is converting the circuit boards in our single stage manufactured housing furnaces to a new Emerson design. This new Emerson board will have the same functionality as our current design with minimal impact to installation and serviceability. These new boards maintain the same easy-to-locate, face-out mounting our customers appreciate.

The new board is **not** backwards compatible.
 The legacy UTEC board will continue to be sold as a replacement for models that utilized it.

Please ensure you and your customers reference the serial number when determining which board to use as a replacement. 1041648R will be the replacement part number new Emerson board. Please see the implementation dates below.

MODELS AFFECTED:

Model	Implementation Date
MG2R	7/4/2022
MG23P	8/23/2022
MG1E	9/1/2022
CMF95	9/7/2022
