
TECH TIPS – AFTER SALES SUPPORT

Subject: Tech Tips Tuesday: Coil Mount Support On The AHU

Brief Summary: This week's Tech Tip is covering the Hisense AHU positions and where to place the coil mount support. Please see the below images with the support in the proper position based on positioning of the coil. Without the coil mount support in place, or improperly placed, this can cause the coil to be pitched improperly causing drainage issues.

***For the 18K-30K Edge and Smart sense series there is no additional clasp to relocate.

Scan the QR code for the Hi-Tech app for additional information and support!
