

# How to Add a Network Printer to Your Computer (POLICE)

Learn how to add a network printer to your Windows computer. This guide will walk you through the process of finding and installing a printer shared on your network, ensuring you can print documents from any computer.

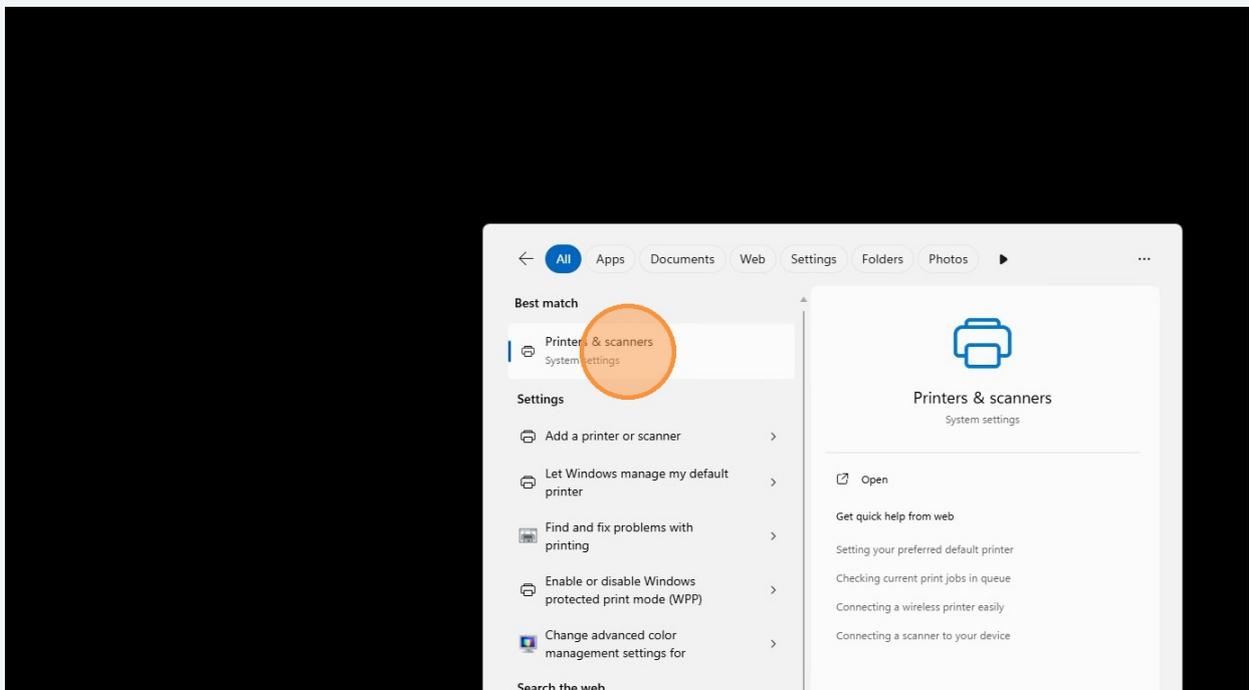

1 Click here

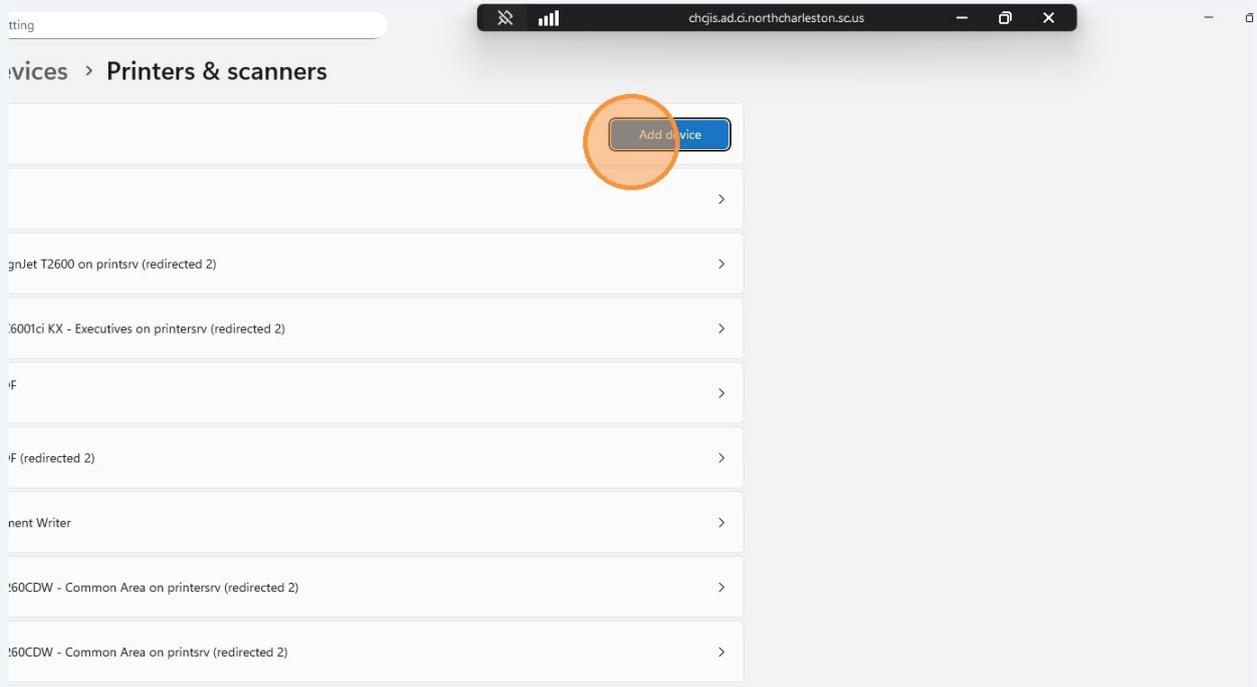

## 2 Type "Printers"

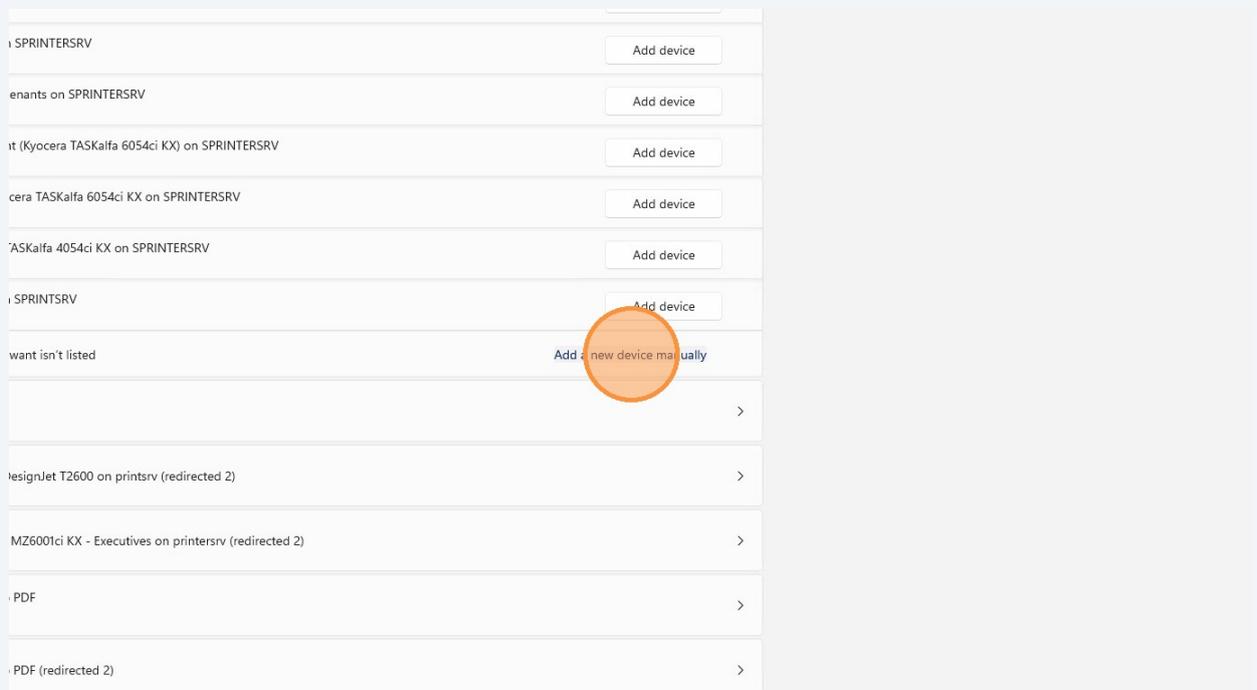

## 3 Click "Printers & Scanners"

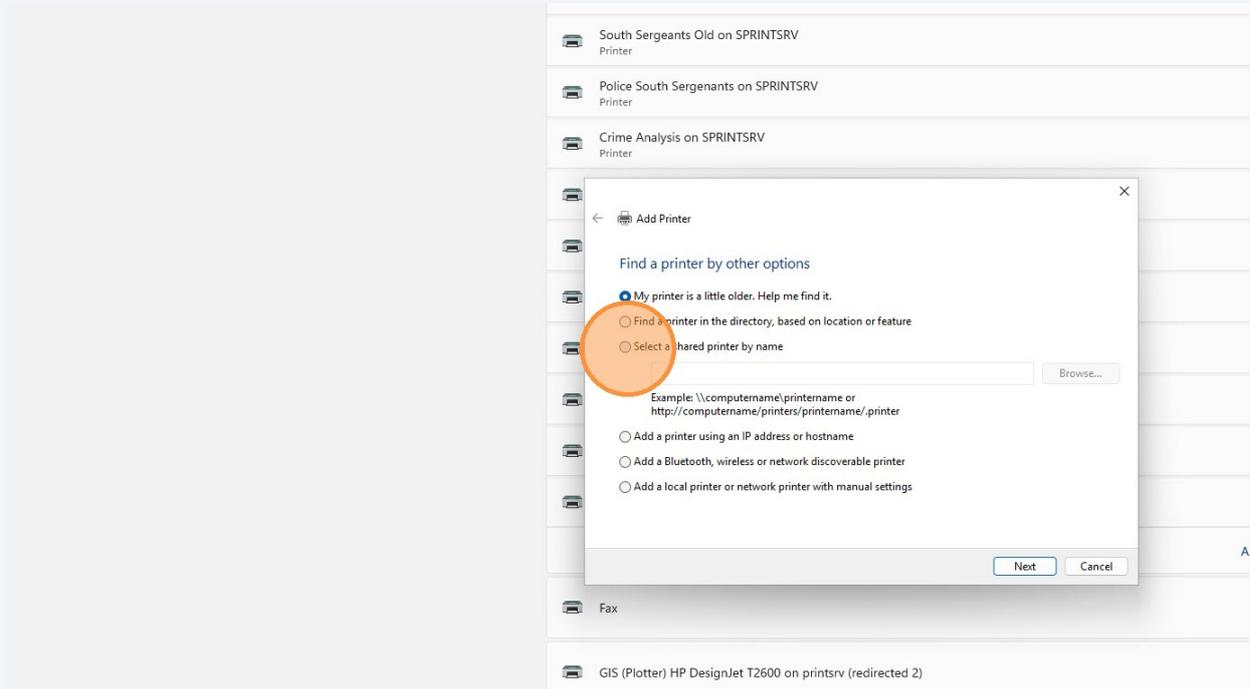

## 4 Click "Add device"

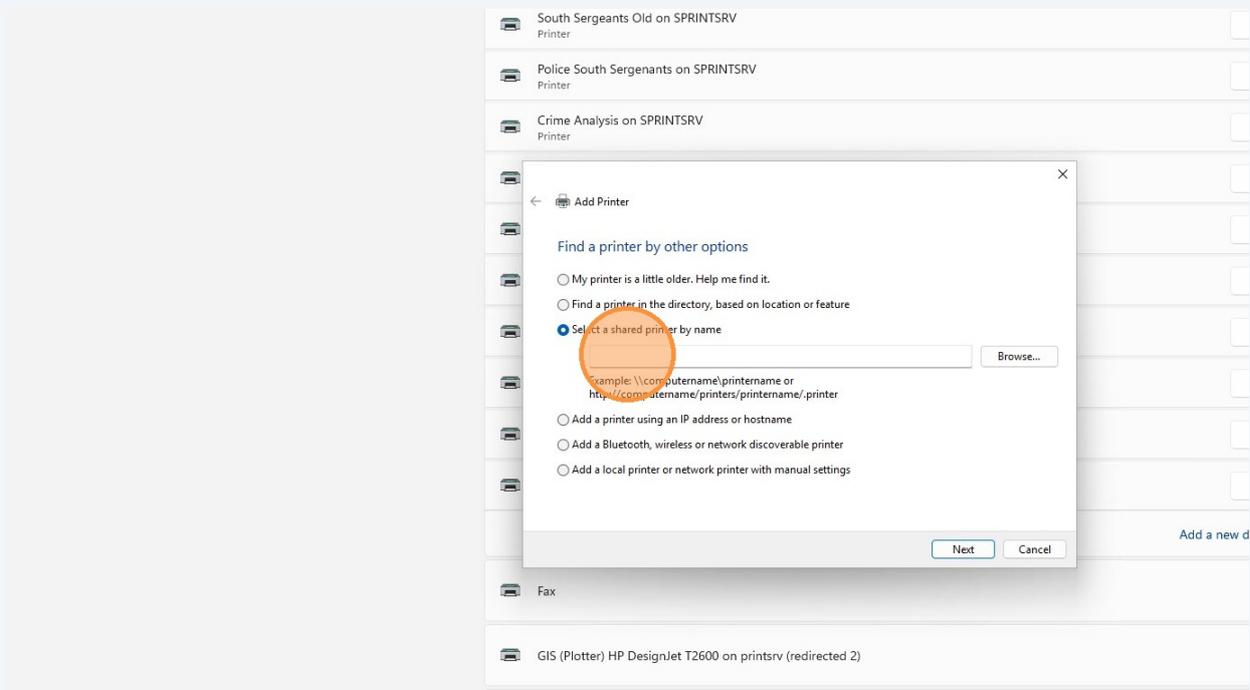

## 5 Click "Add a new device manually"

## 6 Click "Select a shared printer by name"

## 7 Type "\\sprintersrv\"

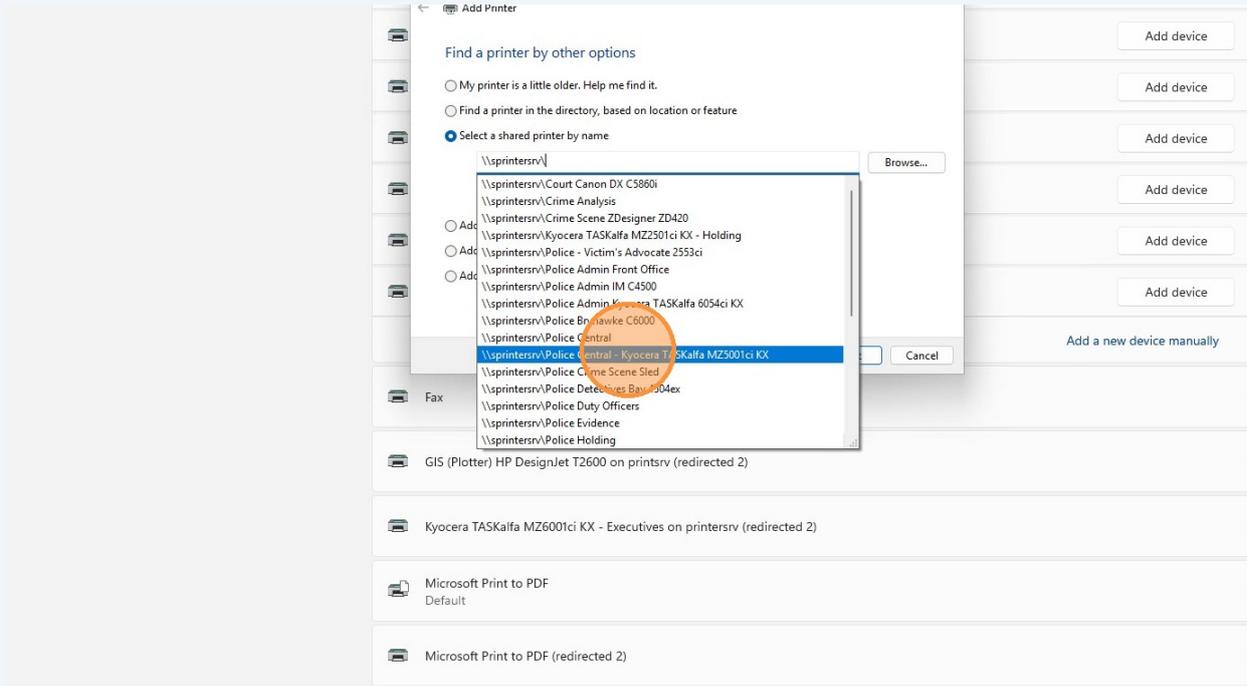

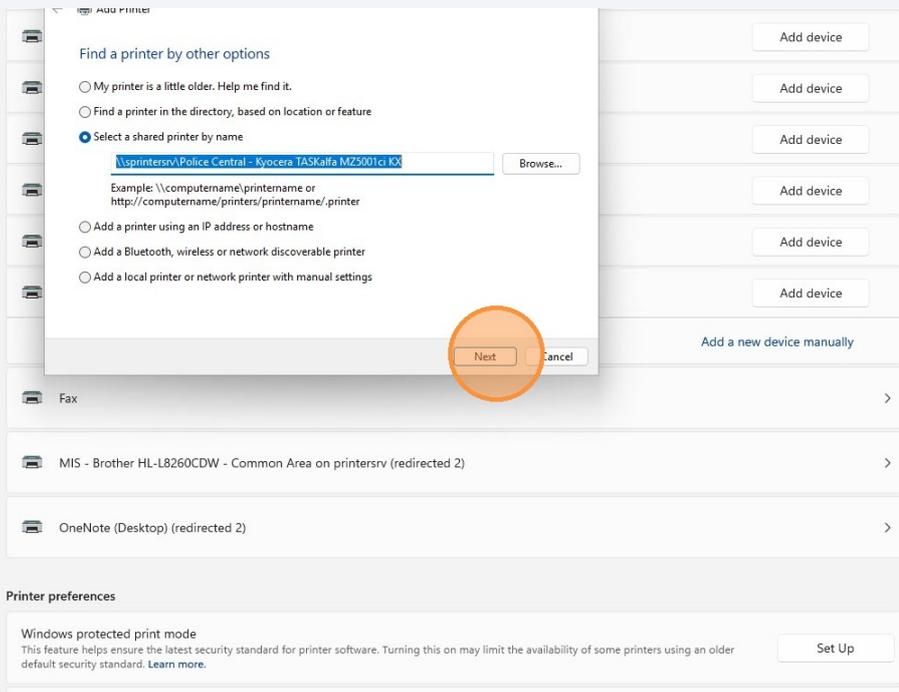

Tip!

Printers are normally labeled with the department or bureau it is located in. In this instance we are connecting to the printer located at Central

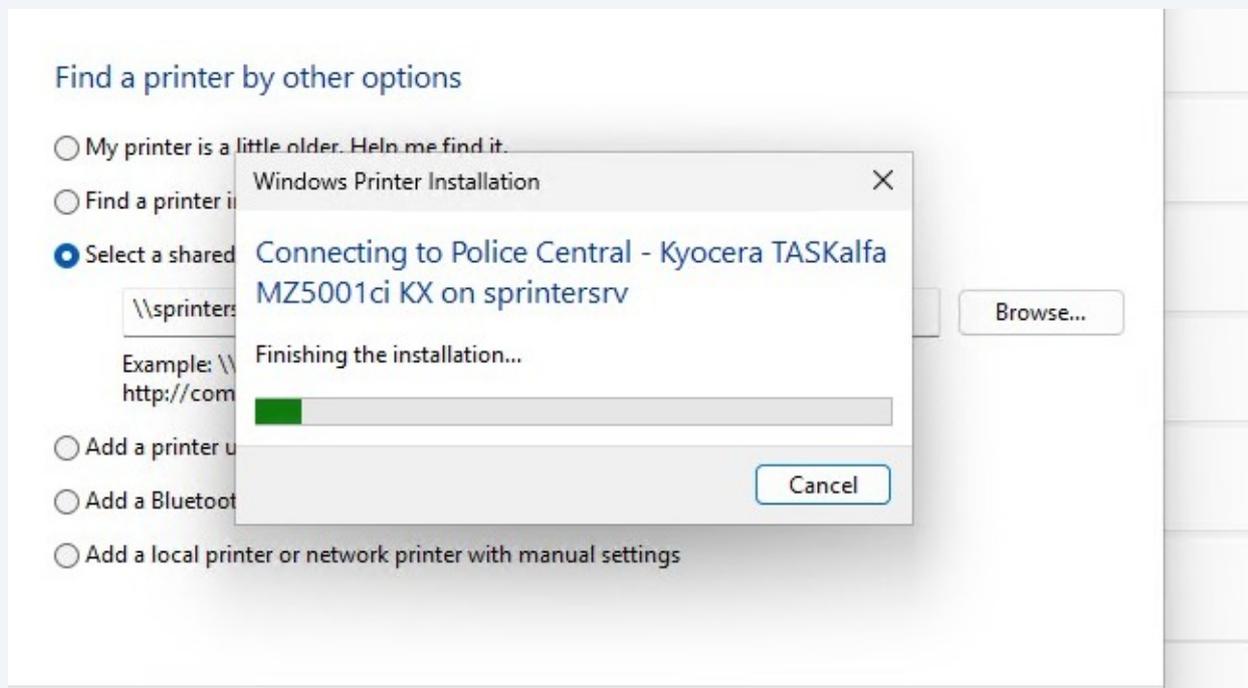

## 8 Find the printer you want to connect to

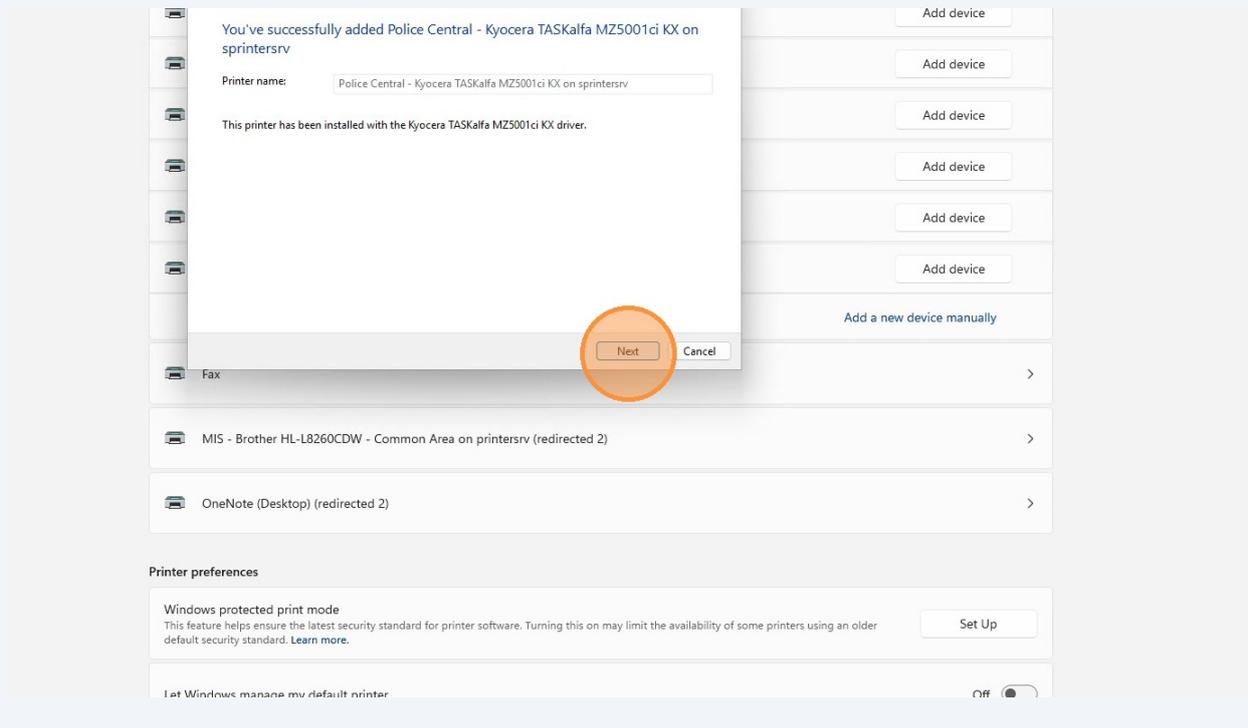

## 9 Click "Next"

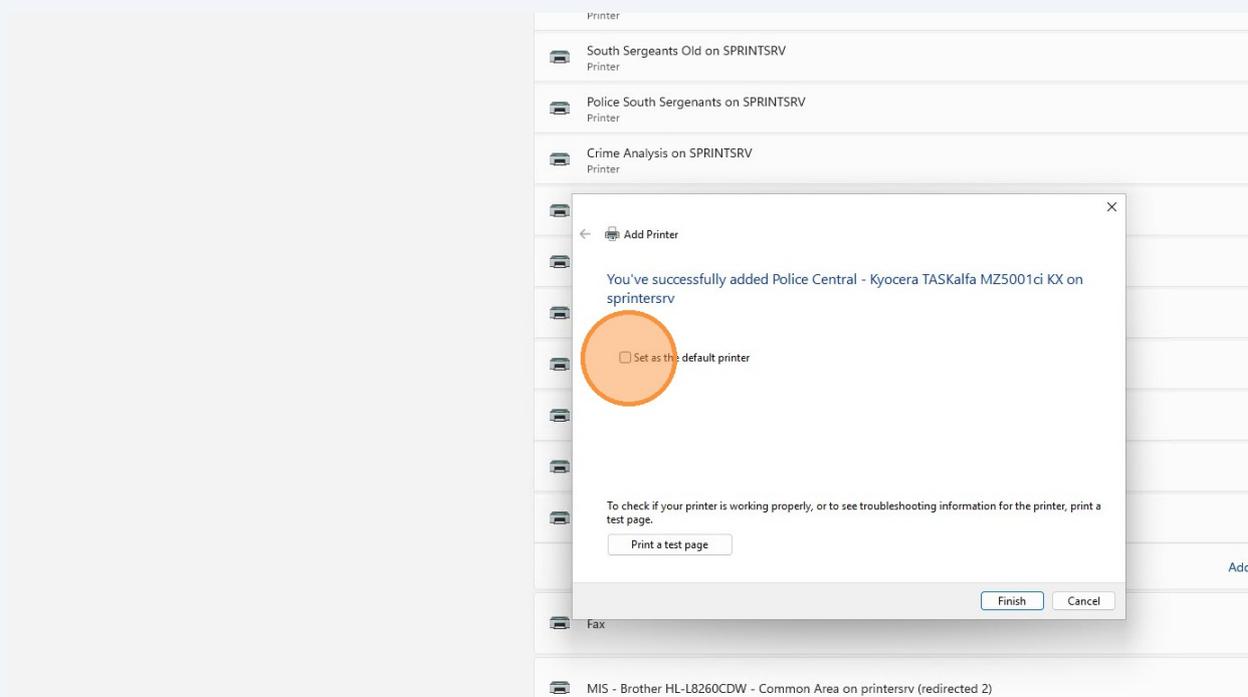

## 10 Let the installation download and finish

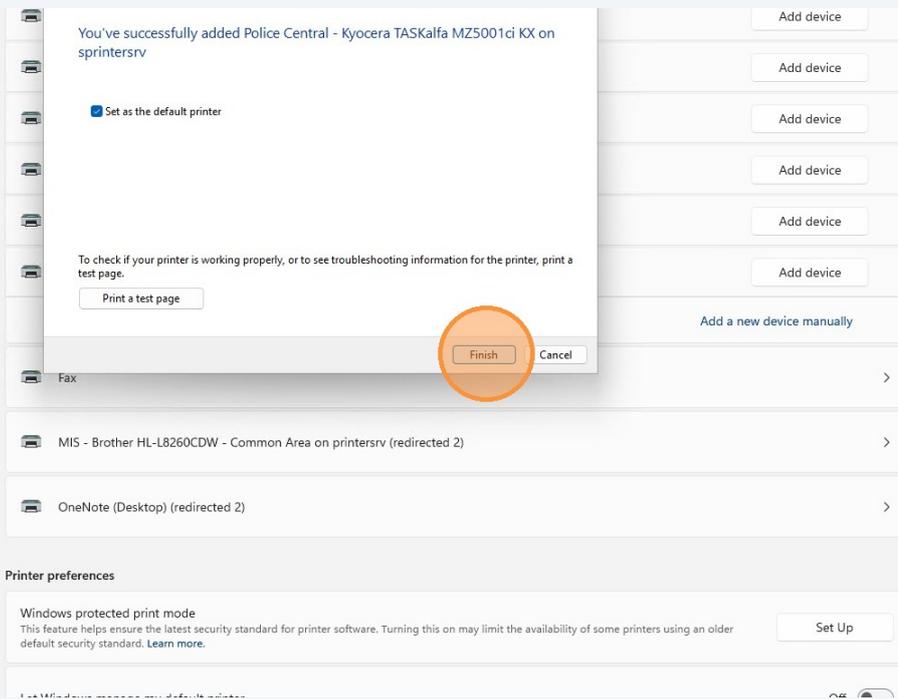

## 11 Click "Next"

## 12 Click "Set as the default printer" if you wish for this printer to be your main device

### 13 Click "Finish"

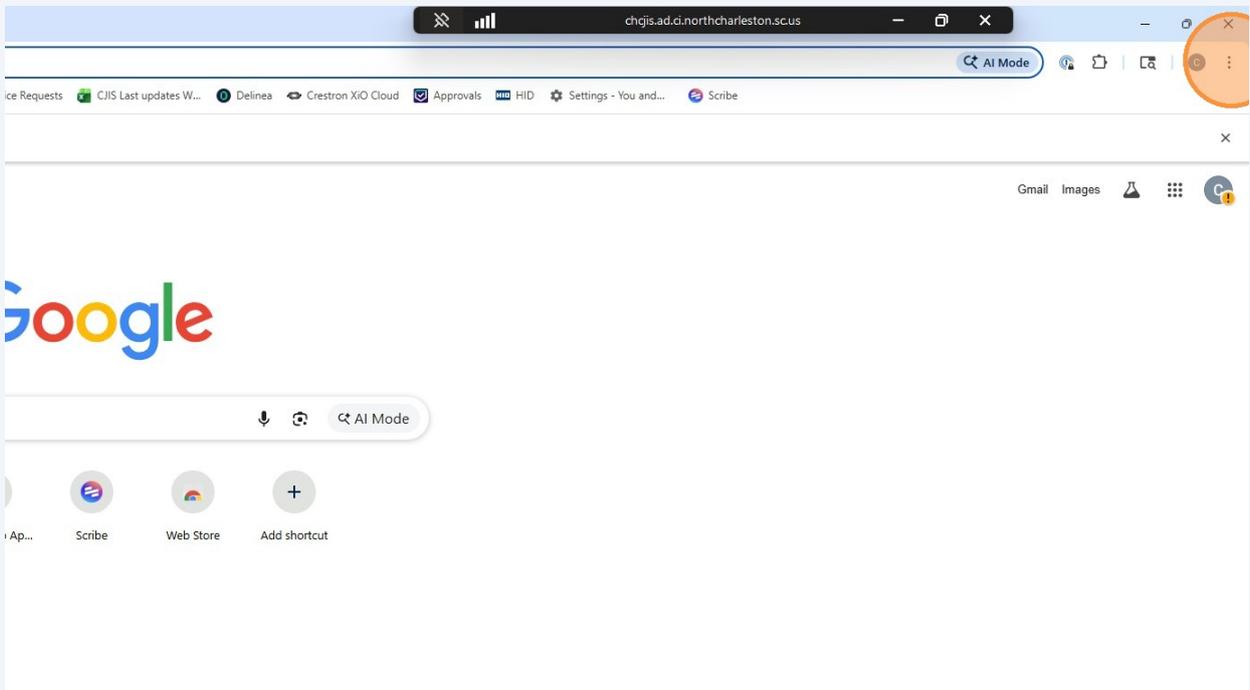

14 Unfortunately on Google Chrome, occasionally the browser does not see the changes you've made. Follow these steps in order to print to the device through the browser

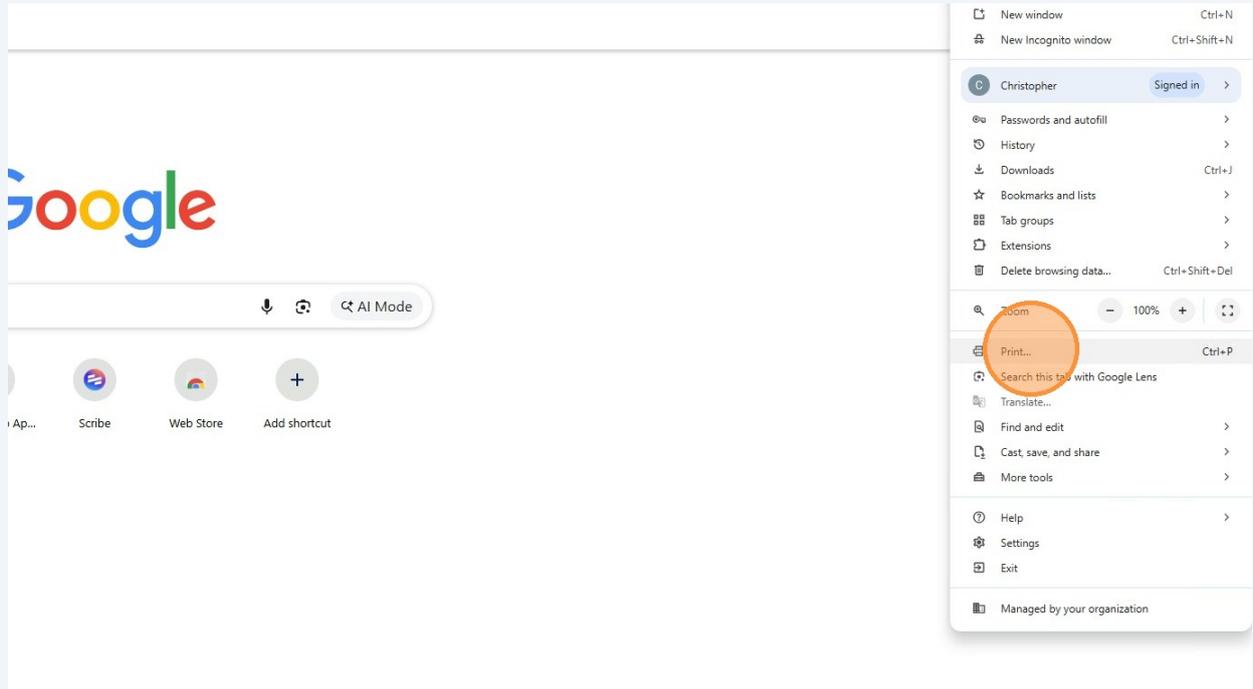

## 15 Open Google Chrome

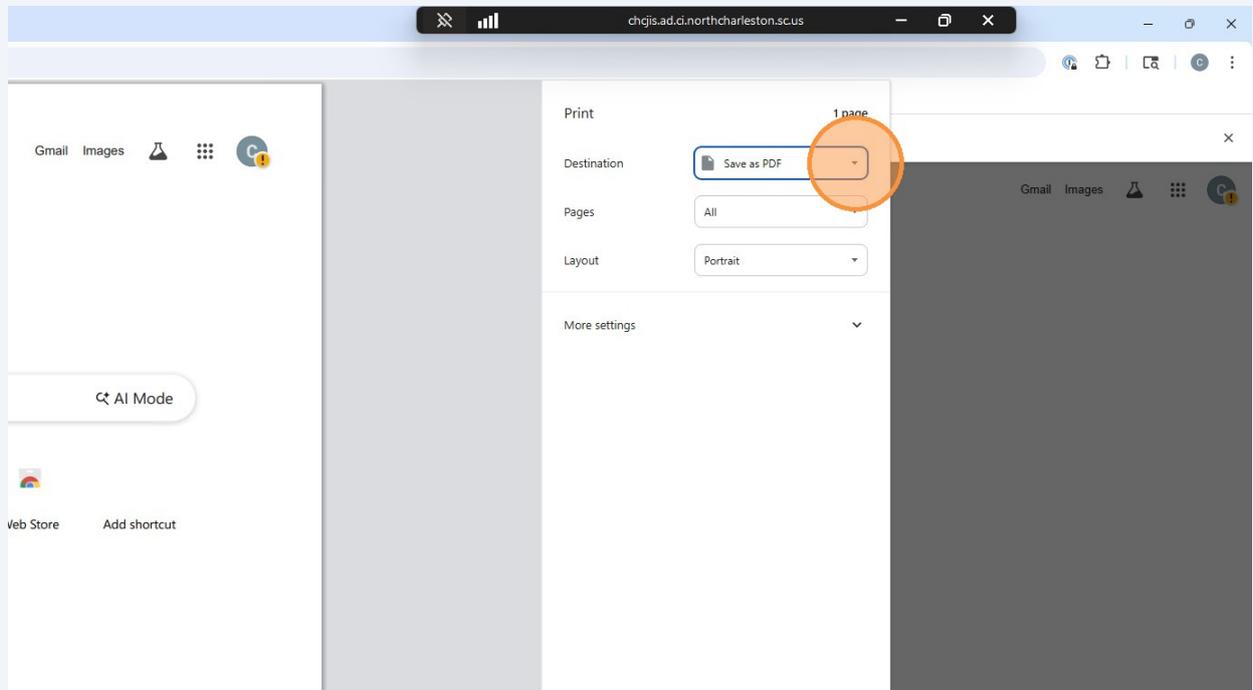

## 16 Click on the 3 vertical dots in the top right corner

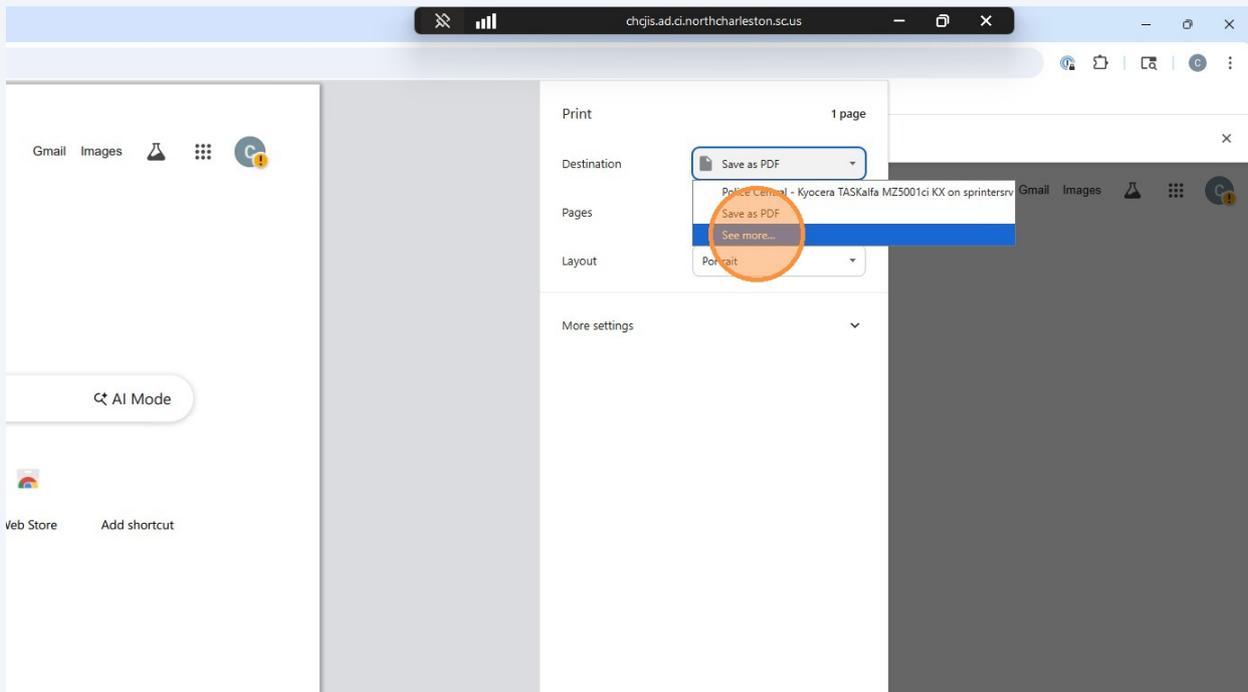

17 Click "Print..."

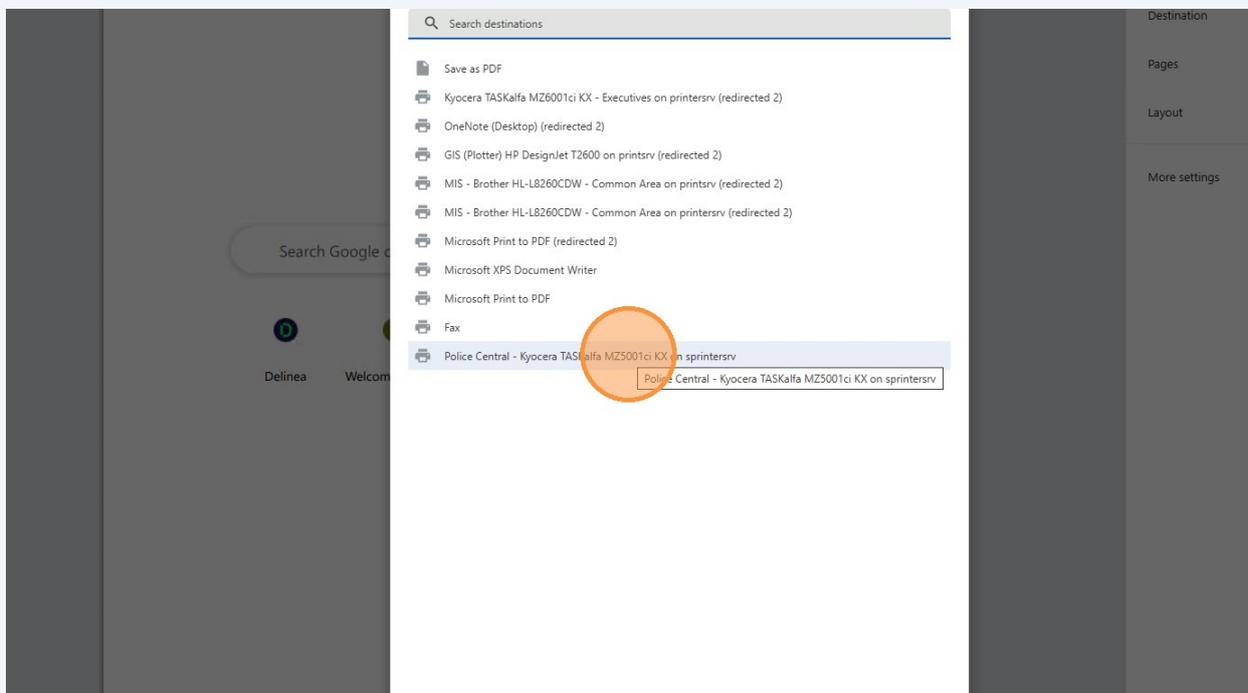

18 In the "Destination" section, click on the drop down arrow

## 19 Click "See more"

## 20 Find and click on the printer you just added

**21**

The printer should now be in the Destination section of the print page.
