

Natural Solutions Protocol

Guideline for Choosing Products

Comprehensive: (Can imprint into a blank or a homeopathic with an alcohol base)

Always Imprint

If V or X Dilution go to the cheat sheet in the back of the Handout Manual and see if there is a corresponding homeopathic and you could use it as an item to imprint.

If there is a Nutritional Item (Vitamin, Mineral, Amino Acid, Fatty Acid, Enzyme or probiotic) that is a V,X,K or C be sure to supplement.

Main Body Scan:

Choose items that are V & X first then if not too many items consider K and C dilutions. *(You can sort this test by click the dilution tab at the top of the screen and it will sort the hold tank by dilutions.)*

Always select the multi vitamin no matter what the dilution and use the Normal Daily Dosage. As far as the other supplements use your judgement when dosing. Example: if you have someone that calls for 5 colon cleansers but they have to work; even if they need it you will want to cut it back so that they can function. If they have a **Chronic or Acute** situation....If they dose low, you may want to increase until you achieve results and then have them reduce it to the recommended dose. Example: If someone has a bladder infection (symptomatic) you may want to increase drops to three times daily and support items to a higher dose to give them quicker relief. **USE YOUR JUDGEMENT!**

If by the description of the item you can identify it is a homeopathic with an alcohol base; it may be used to imprint the comprehensive. Use the dosage on the comprehensive and have them gradually work up to 10 drops 2 times daily. If

there is an additional homeopathic with an alcohol base you may imprint the informational scan into it. Use the dosage on the product and gradually work up to 10 drops 2 times daily. If by the description, you identify an Herbal Remedy with an alcohol base you may use it to imprint the Informational scan. Use the dosage (in teaspoons)(1tsp = 45 drops) of using the herbal remedy. If you have more than 2 “imprintable” items you can imprint the Main Body scan in one of the remedies. Never waste an imprintable item.

Informational Scan: (Can imprint into a homeopathic, blank, or herbal with an alcohol base.)

Sort hold tank by clicking the dilution tab at the top of the screen and it will sort the hold tank by dilutions. Look for nutritional items that are a V or X dilution and make sure they are receiving the supplement. If you have neurological or hormonal issues that are a V or X dilution you may use those as an imprint if they are found as a homeopathic in the nutritional line you carry.

****If you do not have the homeopathic on hand; imprint into a blank. Do not wait to order. It is better to use a blank and then if necessary when doing a refill use the actual homeopathic.
