END USER LICENSE AGREEMENT

Before using the silent installation method please review the End User License Agreement (EULA) for the software, which is found on page 5 of this document. The EULA acceptance screen will be suppressed during a silent installation, however, this does not render the EULA null and use of the application is still covered under the EULA.

SILENT INSTALLATION

To perform the silent installation of the software you need to use a special script named install.sh. This script can be found on the distribution disk image (DMG file). By default, it performs the installation using the installer defaults without presenting any user dialog boxes. To install XPress silently you need to use Terminal application.

1. Run Terminal.app
2. Navigate to the XPress folder:

```
$ cd /Volumes/XPress\ 2.4.12
```

3. Run installer script with elevated rights:

```
$ sudo ./install.sh
```

For large installations a site License ID and Password will be issued, so that all workstations can be activated using a single license.

PERFORMING A SILENT INSTALL WITH AUTOMATIC ACTIVATION

To activate automatically your XPress installation, you will need to edit the install.sh script and fill corresponding activation data. Before editing the installer script, you should copy the installer.sh and the XPress.pkg files to the writable location on your Mac (e.g. Documents folder). You can use TextEdit.app or any other text editor software to edit activation data in the install.sh script.

```
# uncomment the lines below to activate

    # installation with LicenseID and Password

```
    $ sudo ./install.sh
```
