

Quick Setup Guide

What's in the box:

- (1) Receiver
- (1) Wireless Mic
- (1) 1/4" male audio to 3.5 mm male audio cable
- (1) Antenna with screw on connector
- (1) AC Adapter (traditional plug used for powering receiver)
- (1) AC Adapter (with USB plug for charging wireless mic)
- (1) USB Type B to mini-B (used for charging wireless mic)
- (1) Lanyard strap for mic
- (1) Clip on lapel mic (for connecting to wireless mic)

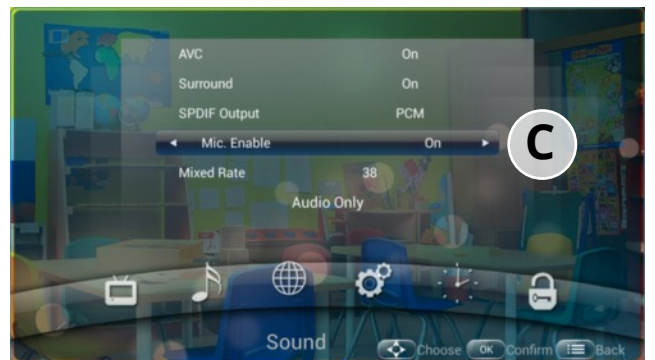

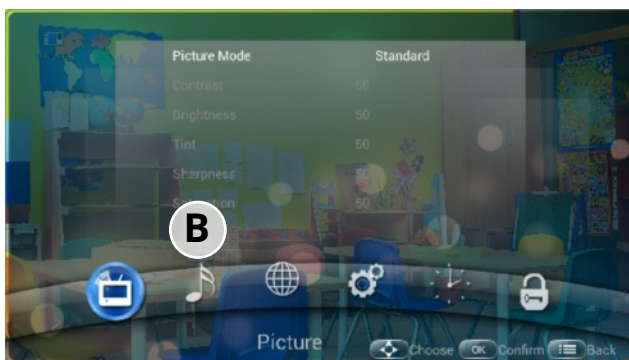

STEP 1: Make connections to Mic Receiver and to Panel.

- A. Screw antenna to rear of Mic Receiver
- B. Plug audio cable (1/4" end) into Mic Receiver
- C. Plug AC Adapter into back of Mic Receiver
- D. Plug other end of audio cable (3.5mm) into the PC Audio #3 port located under front right edge of the SimplicityTouch IFP.

STEP 2: Enable Mic Mode on SimplicityTouch IFP

- A. Press gear button to enter Settings menu
- B. Press Audio Note icon to enter Audio Settings
- C. Touch sound settings and scroll down until you see Mic. Enable option highlighted. Change Sound Mode to Mic Enabled (ON)
- D. Set Mix Rate to 33% (Note that a lower mix rate percentage will result in the Panel audio being louder. A higher mix rate percentage will result in the Mic being louder.)
- E. Press Back to confirm then Exit.

STEP 3: Connect Lapel Mic for Best Results

- A. Plug lapel mic into the wireless mic.
- B. Clip lapel mic to collar as close to mouth as possible.
- C. Put wireless mic in pocket, clip to belt, or use lanyard to hang from neck.

STEP 4: Pair Mic to Receiver

- A. Power on the Receiver (power switch is on front right of receiver)
- B. Power on Mic (power switch is located at top right side of mic)
- *** NOTE: Mic needs to be within 12-36 inches of receiver when pairing)
- C. The mic antenna icon will blink while pairing and will be solid (no blinking) after paired. You should also hear quiet beep when paired.
- D. Use volume control on receiver and mic to reach desired mic volume (NOTE: setting mic volume too high while positioned next to IFP may result in feedback. lower mic volume to eliminate feedback.)
- E. Make sure Mic battery is charged (use USB cable and charger provided to charge mic - charge time is approx 2 hours.)
