Encounter Screens

- HPI now opens the selected Chief Complaint template from the summary view. *(PR 3297)*
- Fixed long Chief Complaint text causing stretching in HPI Alpha Tab. *(PR 5199)*
- Vitals now calculate exact BMI Percentile, Head Circumference Percentile, and Weight-to-Length Percentile values based on age. *(PR 4450)*
- Fixed unnecessary autosaving of vitals. *(PR 5094)*
- Fixed Growth Chart zoom issue causing misalignment between English and Metric readings. *(PR 5140)*
- Fixed Growth Chart displaying deleted encounter data. *(PR 3859)*
- Fixed referral generation issue when a provider is not assigned to the encounter. *(PR 4836)*
- Patient Education can now auto-code CPT charges when added. Contact Support to configure CPT codes. *(PR 1606)*
- Custom Encounter Tabs automatically include new privileges for new tabs. *(PR 5086)*
- Fixed issue where comments were being truncated at 500 characters; longer comments are now supported. *(PR 5178)*
- Added separate print option for Plan/Follow-up in Encounter Summary. *(PR 3132)*
- Prevented users without Edit Privilege from rolling back encounter status. *(PR 5159)*
- Added SDOH Assessment and Disability Status to Medical History tabs. *(PR 5123)*

Scheduler

- Preferred Name will display on appointments only upon client request. *(PR 5093)*
- Fixed Cut/Copy/Move Appointment syncing between providers and resources. *(PR 5127)*
- Enhanced Phone Appointment Reminder performance to reduce message playback delay. *(PR 5188)*
- Removed automatic document type selection when scanning from Scheduler; users can now select. *(PR 5040)*
- Fixed Telemedicine auto check-in issue when meeting starts. *(PR 5192)*
- Fixed issues with Telemedicine appointments scheduled over 90 days ago. *(PR 5137)*
- Payment Log Receipt (for RCM clients) now prints the exact time. *(PR 5097)*

Billing

- Modifiers now appear correctly on the Claim Info tab in Edit Claims. *(PR 5091)*
- Added alert message explaining why charges cannot be added to a non-billable encounter. *(PR 5062)*
- Fixed performance issues when cloning claims. *(PR 2901)*
- Patient Statements now include header-level-only transactions. *(PR 5175)*
- Statements for certain payor types are now calculated based on payor balance rather than expected amount. *(PR 5126)*

Administration

- Added Drag and Drop functionality to all template creation screens. *(PR 1040)*
- Added ability to change Preferred Provider for all patients when deactivating a provider. *(PR 4932)*
- Fixed Location Preferences display to auto-adjust to screen size. *(PR 5081)*
- Updated ICD, CPT (for RCM clients), and SNOMED codes to latest published versions. *(PR 5143)*
- Fixed DBA Field saving issue in Practice Location. *(PR 3360)*
- Removed eLab Payor Entry screen (no longer used by lab companies). *(PR 1450)*
- Added warning when text exceeds character limit in Referral Provider Entry. *(PR 4233)*
- Added functionality to copy settings from one location to another. *(PR 3460)*
- Implemented data-driven menu visibility for better customization. *(PR 5130)*

Reports

- 2026 Clinical Quality Measure (CQM) Reports now available. *(PR 5142)*
- Fixed numerator calculation issue for CMS 349. *(PR 5053)*
- QRDA Category 1 files now generate for non-certified measures as well. *(PR 5141)*
- CMS 122 now supports more eLab results even when LOINC is missing. *(PR 5101)*
- All reports now exclude patients marked "Do Not Show in Reports." *(PR 5066)*

Patient Portal

- Patients can now view their Billing Statements under the Billing menu. *(PR 4994)*
- QR codes on statements now direct patients straight to Make a Payment without requiring login. *(PR 4841)*
- The ability for patients to cancel appointments via the portal is now configurable. Contact Support to enable or disable. *(PR 4733)*
- Messages from staff now display the sender as [Practice Staff] to maintain privacy. *(PR 4895)*
- Multi-location practices now prompt patients to select a Location when requesting appointments. *(PR 4819)*
- Users can now see who created or modified Portal Associations for a patient. *(PR 5150)*

Other Enhancements

- Spell Check enabled in additional screens. *(PR 646)*
- User Forms now support Patient and Provider Signatures. *(PR 2691, 4801)*
- User Forms now support Immunizations Administered. *(PR 4530)*
- Improved system logging to enhance issue tracing and debugging. *(PR 5197)*
- Fixed performance issues when adding more than 30 diagnoses via Plan Add Dx. *(PR 5096)*
