

Release Notes

ReLi Med EMR • May 2026 • Version 7.3.8

This release includes product enhancements, issue resolutions, usability updates, workflow improvements, and performance optimizations across the ReLi Med EMR platform.

Total Problem Requests/ Enhancements Included: 104

New Features & Enhancements

NovaReLi AI Scribe: Use this new product from ReLi Med Solutions while conversing with your patient or as a dictation/transcription assistant to do complete charting for the encounter. Please contact ReLiMed Support if you want to enable this feature. It will incur additional costs.

NovaReLi EMR: NovaReLi EMR now has some encounter and medical history tabs to chart on the web. Vitals, HPI, ROS, PE, PMH, SH, FH etc. are now available to chart on. This product is **free** for all ReLiMed EMR clients.

NovaReLi EMR with Picture Annotation: We now have picture annotation tab available under Encounters. You can select a body organ system to chart on NovaReLi EMR. This will be added to the chart note under encounter summary that is accessible on ReLiMed EMR.

Admin Screens

- Personnel: We now allow Office Administrators to get ID proof performed by ReLiMed Support and they can in turn do manual verifications for eRx for the new providers who do not need EPCS. **(PR #5070)**
- Personnel Entry: The issue of when a user is set as provider and then changed to non-provider, provider info persists causing user to be recognized as a provider is now fixed. **(PR #5136)**
- Personnel Entry audit for EPCS reporting has been further enhanced **(PR #5299)**
- Provider Info: we now provide the ability to change Preferred Provider on patients before deactivating a provider and removes the inactive provider **(PR #4932) (PR #5146)**
- Ability to copy Zoom License from one location to the other and one provider to the other is enhanced **(PR #5145)**
- Privilege Checking features have been further enhanced with the enhancement of custom encounter and medical history tabs **(PR #5187) (PR #1499)**
- Location: Print Preferences: Added Drag/Drop feature to all document types **(PR #5198)**

- Tests and Procedures Admin screen issue with constant popup messages of missing a selection is now fixed **(PR #5218)**
- Import Template now shows inactive providers, allowing other active providers to access their templates. **(PR #5233)**
- HPI Question List Entry: issue with end date value not saving all the time is now fixed **(PR #1728)**
- History Question Entry screens are now enhanced to provide the ability to add SNOMED, LOINC codes for each question. **(PR #2048)**
- Admin: Enhanced Practice Location/Configuration options for ReLiMed Support to provide faster service **(PR #5073) (PR #5067)**

Billing

- Payor Entry screen now allows us to store PTAN and NPI numbers needed when calling the payors in preferences grid **(PR #2051)**
- Payment Ledger screen is enhanced to take posted date range to filter on, enabling the users to easily search for payments **(PR #5153)**
- Billing: Error when attempting to post payment for claim with missing code has been fixed **(PR #5278)**
- Billing: Auto-Posting is now posting \$0 payment transaction line, this now helps secondary claim filing **(PR #5307)**

Encounter Screens

- Encounter List: Add New Encounter now gives the ability to choose a Resource **(PR #2063)**
- Vitals: We now provide the ability to enter multiple Readings for Height and Weight. **(PR #4682)**
- Vitals: The issue of saving even when accessed and not actually edited is now fixed **(PR #5094)**
- HPI: Generic concurrency issue causing narrative from the provider to disappear is further enhanced **(PR #3418)**
- HPI: We now provide the ability to group chief complaints **(PR #5074)**
- Custom Encounter Tab: We now allow you to select template type of 'Note View' in a custom tab allowing you to add generic rich text edit for charting **(PR #5264)**

- Referral: Hx button is available on every referral order which allows you to review the history of that order **(PR #1583)**
- Referral: We now provide the capability to add STAT to a Referral **(PR #5201)**
- Referral: Send message feature for referrals is enhanced to reduce user confusion **(PR #5201)**
- Referral: We no longer include all patient documents by default while performing an export. **(PR #5196)**
- Calculating DX for BMI Range for patients between 18 and 21 will consider them as adults rather than as children **(PR #5099)**
- Encounter Sign Close: Supervisor button is not showing for telemedicine appointments is now fixed **(PR #5229)**
- Data Export error when attempting to export data for an encounter with no provider is now fixed **(PR #5191)**
- Encounter Summary: If available, the provider's signature will now show on the generated summary when displayed on the EMR **(PR #5314)**

Labs

- Lab Orders: Add label/warning on screen to indicate only first 4 diagnosis codes that go with order **(PR #4888)**
- Interfaces with lab results to be transmitted to, when they are reviewed much later than when they were received, are now enhanced **(PR #5279)**
- Lab Interfaces with new lab companies in different states have been added **(PR #5281)**
- Users that subscribed to e-faxing feature can fax labs to a lab company directly by clicking on Transmit even if they do not have the eLab Interface **(PR #99)**
- We now added DOB to labels on lab requisitions for LabCorp **(PR #4844)**
- Lab Entry: Issue when location Main Phone is not added, Labs not printing, is now fixed **(PR #5235)**
- Lab Result: New Message screen not popping up when some fields have no values is now fixed **(PR #5242)**

Medications

- eRx: Schedule II: ReLiMed eRx now has easier way to create 3 30-day Rx's with one click. **(PR #4960)**
- On popular request, we now can set a preference to not add End Date on any medication (not just on chronic meds). Please contact ReLiMed Support if you want this preference to be turned ON **(PR #5019)**
- When Refill button is used to refill a medication, the system will now keep the diagnosis code the medication was originally added for **(PR #5259)**
- Issue with Refill button keeping the old med Pharmacy instead of top pharmacy is now fixed **(PR #5048)**
- Quick Refill is no longer allowing blank/non-numeric value for quantity **(PR #5267)**
- Favorite Signa feature is further enhanced to not allow blank signa as favorite, save dispense as written as well along with other items **(PR #3744) (PR #4887)**
- Editing signa in medication grid on an existing active medication is now further enhanced to check user privileges and also ask for new end date if dose is changed **(PR #5075) (PR #4961)**
- Refill Requests: Many enhancements are added in this feature for usability and tracking **(PR #5172) (PR #3934) (PR #5212) (PR #4507) (PR #5217)**
- Prescription transmission process is further enhanced to update and display information clearly **(PR #3947) (PR #5213) (PR #5220) (PR #5215) (PR #5216)**
- When Cancel Rx is Denied by pharmacy, the system is now setting the medication back to active **(PR #4979)**
- Rx Change Request: we have enhanced Rx Change Request feature for usability and tracking **(PR #5078) (PR #5211)**
- Medications (Surescripts History): Med Hx import feature is further enhanced to receive history information **(PR #5164)**
- Medications: eRx: Surescripts Providers: unable to re-activate an inactive provider with future date issue is now fixed **(PR #5076)**
- Pharmacy Search now gives the users the ability to select Mail Order Pharmacy as an option **(PR #5234)**

- Selecting a default start date while adding a medication is fixed so it won't prompt the users to add one **(PR #5246)**
- Refill/New Medication without an RxNorm value causing all medications to be inactivated is fixed **(PR #5226)**

Patient Screens

- Changed the caption from Phone to Contact Info in all demographic screens **(PR #2881)**
- Patient Demographics: New practice preference to default Photo ID tab over Picture tab and provide a way to easily set a document type to display as Photo ID **(PR #3580) (PR #5271) (PR #4285)**
- Patient Info: SSN number needs to validate 9 non space chars and names should strip leading spaces and provide a more descriptive error message when it's not validated **(PR #4642)**
- Personal Contacts: Personal contact address now syncs with patient address if Address is marked same as patient **(PR #5098)**
- Billing team now can edit patient insurance on restricted patients **(PR #5138)**
- Document Management: When uploading with the same document & using today's patients' dropdown it will continue to display the selected document **(PR #5195)**
- Patient Agreements: Agreements that are defined as User Level are now displayed appropriately **(PR #5251)**

Scheduler

- Scheduler: 5 min intervals in Daily Work times under Scheduler Options is now available **(PR #5231)**
- Issues with Undo Checkin / Delete Appointment not working sometimes is now fixed **(PR #5247)**
- A preference is now available to add patient alerts to face sheet, please contact support to set this up **(PR #5239)**
- Reports: 'Custom report for Appointment Verifications' reporting is now available **(PR #5273)**
- Appointment Reminders Set up process is enhanced allowing ReLiMed support to provider faster turnaround to set it up **(PR #4940)**

CQM Updates

- CQM 122: Issues with multiple results or no results in different areas are entered are now fixed **(PR #5245) (PR #5262) (PR #5252)**
- CQM 2026: Descriptions for CQM Measures are now fixed **(PR #5302)**
- CQM: Search Patient by Measure is now working **(PR #5284)**
- CQM 137: is added to Other Measures **(PR #5203)**
- CMS2: enhanced to look for Pharmacological intervention and Pt education documented under test and procedures **(PR #5285)**
- CMS130 is now displayed under certified list **(PR #5293)**
- CQM 125, 130 are enhanced to include numerator data from health maintenance values **(PR #5294)**

Performance & Stability

- Signatures: We have enhanced the signature capture for a patient as well as a provider **(PR #2340)**
- Patient communications now have Hx button available **(PR #5182)**
- In some screens where we used some temporary names in blank fields are now removed reducing user confusion **(PR #5282)**
- Random freezing in different parts of the application is now fixed **(PR #5283)**
- Some interface enhancements are made to accommodate changes made by different state HIEs **(PR #5295)**
- Custom list entry concurrency issue is now fixed **(PR #5232)**
- General product and tools upgrades to latest versions have been performed **(PR #5193)**

NovaReLi EMR, Patient Portal & Kiosk Updates

- NovaReLi Picture Annotation: Providers can now select a picture of body organ system and annotate on it **(PR #1611)**
- NovaReLi EMR: Many tabs are now available for encounter editing in our web-based application **(PR #4845) (PR #5054)**
- NovaReLi EMR: Scheduler Resources now allows customization of resource colors. Please contact support to set this preference **(PR #4538)**
- Patient portal: now hides inactive patients from drop down **(PR #4843)**
- Patient Portal is further enhanced to allow ReLiMed support to provide faster setting changes when requested **(PR #5149)**
- Kiosk/Patient Portal: The DOB field on login is fixed to reduce user confusion **(PR #5227)**
