Click on the 3 dots in the upper right hand corner and click on *Settings*

Click on *Privacy and Security* then click on *Clear Browsing Data*

Click on the tab that says *Advanced*, then make sure the dropdown box of options says *All Time*. You can uncheckmark the browsing history and download history if you prefer, just make sure that the *Cookies and other site data* and the *Cached Images and Files* stay checked. Press the *Clear data* button.
