

# Registering a wireless device

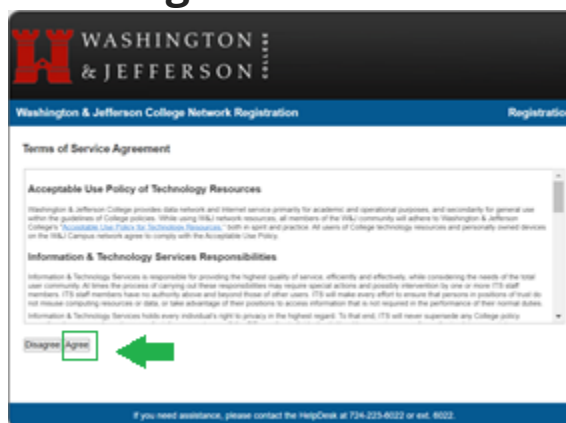

## On Campus wireless device registration

The screens and prompts may vary slightly depending on the computer's operating system version.

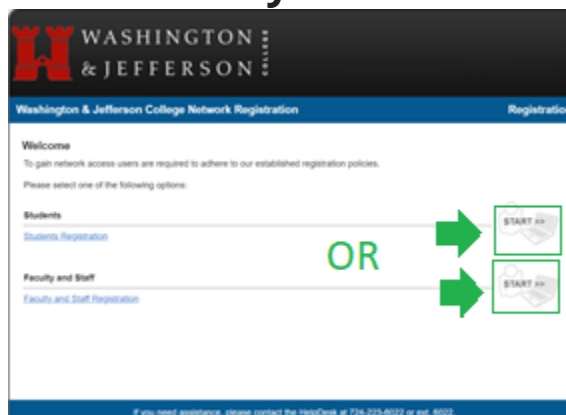

1. Ensure the wireless card is active.
2. Connect to the **WashJeff** wireless network.

*NOTE: Platform and OS specific instructions in wireless devices*

3. Launch any browser. (I. Explorer, Chrome, Firefox, Safari)
4. The browser will be redirected to the Washington & Jefferson College Network Registration page.
5. if not, type [www.washjeff.edu](http://www.washjeff.edu) in address bar (page not loading? Try another browser)
6. Read *Terms of Service Agreement*
7. Select **Agree**

8. Select **Faculty and Staff** or **Students** >> **Start**

9. Type **Unique W&J Username** and **Unique W&J Password**. select **Continue**. (username and password are case sensitive)

The screenshot shows the 'Washington & Jefferson College Network Registration' page. At the top is the college's logo and name. Below it, the page title 'Washington & Jefferson College Network Registration' and a 'Registration' link are visible. The main heading is 'User Registration'. A paragraph states: 'Each user is required to verify that their device will meet established network policies prior to connecting to the network.' This is followed by a note: 'You must already have an active account in order to register.' Below this are three bullet points: '• It is recommended that clients connecting through an Ethernet cable should turn off their wireless adapter.', '• If you know your username and password please fill out the form below.', and '• If you do not know your username and password, please contact the help Desk at 724-223-8022 or ext. 8022.' A line of text says: 'Please enter your W&J username and password. Then click the Continue button.' At the bottom is a form with two input fields labeled 'Username' and 'Password', and a 'Continue' button below them. The 'Continue' button is highlighted with a green border.

10. Once the Network Confirmation Page has successfully loaded, restart the computer and access the internet

### *Information*

The maximum total number of networking devices per username is seven.
